Application/Control Number: 10/669,819

Art Unit: 1626

Claims 1-16 are pending in this application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 4-9, 11, 13-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 4, 6 and 8 improperly depend from claim 1, claims 5, 7 and 9 improperly depend from claim 2 or 3 for failure to limit the scope of their independent claims. The dependent claims recite intended use of the their respective independent claims. Under US patent practice intended use is not a limitation of a product or compound. *In re Hack,* 114 USPQ 161 (CCPA, 1957); *In re Craig,* 90 USPQ 33 (CCPA, 1951); *In re Benner,* 82 USPQ 49 (CCPA, 1949). Therefore, claims 4, 6 and 8 are duplicates of claim 1; 5, 7 and 9 are duplicates of 2 or 3. By deleting the duplicates the rejection would be overcome.

Claims 11 is a substantial duplicate of claim 10, and claim 13 is a substantial duplicate of claim 12. For compounds of claims 10 and 12 to be used for inhibiting of treating HIV they necessarily must be used in form of a composition. By deleting "2 or" from claims 11 and 13 the rejection would be overcome.

Claim 14 is drawn to the same subject matter of claim 12 and claim 15 is drawn to the same subject matter of 13. Therefore, 14 and 15 are duplicates of 12 and 13 respectively.

Under US patent practice duplicate claims or substantial duplicate claims cannot be in the same application. By deleting claims 14 and 15 the rejection would be overcome.

Application/Control Number: 10/669,819

Art Unit: 1626

Claim 16 is written in functional language and therefore, broader than the enabling disclosure. For example, the claim recites "preparing", "interconverting", "deprotecting" and "converting" in steps (C)-(E). The claim must recite how one of ordinary skill in the art would perform the "preparing", "interconverting", "deprotecting" and "converting". The claims must recite the reagents, the reaction times, pH, and reaction conditions that are involve in the steps. Also, the structure of the products of steps (A)-(B) must be shown in the claim. Applicant may not claim all applicable processes of "preparing", "interconverting", "deprotecting" and "converting" in the instant invention, known and yet to be developed. Applicant must claim only the processes that embody applicant's invention.

A claim must stand alone to define the inventions, and incorporation into the claims by reference to the specification or an external source is not permitted. Ex parte Fressola, 27 USPQ 2d 1608, BdPatApp & Inter. (1993). In patent examination, it is essential for claims to be precise, clear, correct, and unambiguous. *In re Zletz*, 893 F.2d 319, 13 USPQ2d 1320 (Fed. Cir. 1989).

Allowable Subject Matter

Claims 1-3, 10 and 12 are allowable over prior arts of record.

Telephone Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Taofiq A. Solola, PhD, J.D. whose telephone number is (571) 272-0709.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Joseph McKane, can be reached on (571) 272-0699. The fax phone number for this Group is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-1600.
